

## Specifications

Power Supply	100~240VAC, 50/60Hz, 200VA
Flow Rate	0.1~10ml/s
Pressure Limit	325PSI
Auto Filling Rate	8ml/s
Air Purge Rate	1.0~9.9ml/s
Piston Rod Speed	9.9ml/s
Phases	6
Injection Programs	2000
Injection Records	2000
Volume	A: 1~200ml B: 1~200ml
Multiple Language User Interface	

## High Quality Disposables

- 200ml Syringe for Contrast
- 200ml Syringe for Saline

# ANT200200

## CT Dual Injector

Leading Contrast Media Injectors Forward

# CT Dual Injector

Introducing an all-new ImaStar CT dual injector, offering an extended list of product features, reliable performance, and a safe patient experience.

## Ease of Operation and Clinical Efficiency

- Large touch-screen display on the injector head provides convenient access for loading, filling and purging air during set up
- Optional IV pole
- Test injection mode

## Independent Dual Motor Drive System

- Dual motor drive capability for time saving loading and filling of syringes
- Allows independent injection of contrast and saline

## Dual Head Flexibility

- Simultaneous injection protocol designed for advanced cardiac CTA and Spectral CT imaging exams
- Optimization of contrast usage
- Post injection saline flush separate from contrast injection to reduce contrast wastage

## Simultaneous Flow Feature

- Allow simultaneously filling, air purging, contrast and saline injection
- Allows the control of contrast density in both sides of the ventricles
- Significantly reduces CT artifact
- Able to observe the right coronary arteries, right atrium and right ventricle in the same image

### Heater

- Ensures contrast maintains at ideal temperature

## Color Touch-Screen

- 12.1 and 7" color touch-screens for easy operation
- Clear and concise information display to ensure user operational confidence

## Injection Record Storage

- Stores up to 2000 injection history records

Bluetooth communication

## Auto Detect

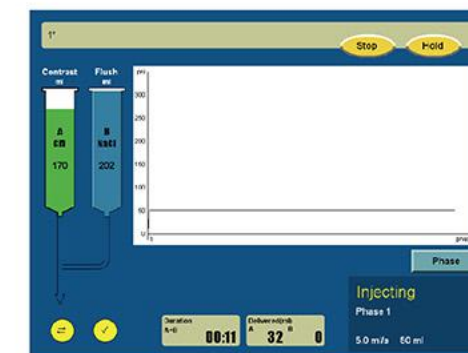

- Syringe detection feature automates air purging and piston rod operation

## Connect to Other Imaging Equipment

- Connect with other imaging equipment for enhanced imaging, use contrast more efficiently and minimize radiation
- Option

## Real-time Pressure Curve

- Display provide real-time pressure monitoring curve

## A Variety of Configuration Options

- Stores up to 2000 customized injection programs
- Program storage capacity can be increased based on user needs

## Safety

- To ensure the safety of the injection, there is a double confirmation feature with separate prompts to confirm air purging and injection ready status before any injection
- Automatically slows down the injection when approaching to pressure limit
- Injection stops when pressure limit is reached. Alerts with both light and sound
- Waterproof injector head designed to minimize damage from contrast and saline leakage
- Ability to pause and resume while injection is underway
